## Create flask:

The screenshot shows the Visual Studio Code interface. On the left, the Explorer sidebar displays a file tree for a project named 'FLASK'. It contains a subdirectory with files like '\_\_pycache\_\_' and 'app.py', and a file named 'flask - Shortcut.lnk'. The main editor window is open to 'app.py', showing the following Python code:

```
1 from flask import Flask
2
3 app=Flask(__name__)
4
5 @app.route("/")
6 def hello_world():
7     return "<p>Hello World</p>"
```

Run flask:

The screenshot shows a terminal window with the following output:

```
C:\Users\91638>cd C:\IBM\flask
C:\IBM\flask>flask run
 * Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment
